SCANPLAN PLUS

A SUPERIOR MAINTENANCE & DRIVELINE REPAIR PLAN

www.cableprice.co.nz

Keep your Scania's wheels turning... and earning.

Introducing the Scania Driveline Repair & Maintenance Contract...ScanPlan PLUS

What is a ScanPlan Plus Contract?

A tailor made ScanPlan Plus repair and maintenance contract provides scheduled servicing and total driveline repair cover on your Scania vehicle to help it remain in premium operating condition and ensure significantly higher levels of uptime so your vehicle can keep earning for you.

What are the benefits of a ScanPlan Plus contract ?

A ScanPlan Plus driveline repair and maintenance contract provides the certainty of fixed costs and the peace of mind of manufacture-backed servicing from professionals trained and supported by Scania. Our service technicians use only specialist Scania equipment and fit only genuine Scania parts that are designed for your vehicles optimal performance, so you know the job is done right the first time!

How will a ScanPlan Plus contract save me money?

Because Scania & CablePrice have a better understanding of the Scania product than anyone, we know the maintenance and driveline repair costs of every vehicle in every application.

So no matter if you are involved in heavy haulage, bulk fertilising or daily freight, our better understanding of your Scania allows us to maximise your vehicles uptime and pass on significant savings on parts and labour that would otherwise be unavailable.

ScanPlan Plus contracts also save you money because they allow operators to rid themselves of the costs and effort of maintaining their own workshops and also increase uptime as a result of the vehicle being better maintained and repaired. Potential problems are identified and rectified before they can cause the vehicle to be put off the road (which costs you in lost earnings).

In addition, the residual value of the vehicle is improved because potential buyers recognise the value of regular manufacture-supplied maintenance. Scania vehicles that have enjoyed repair and maintenance contracts retain their value better than Scania vehicles that have not been under contract.

To ensure the longevity and optimal performance of your Scania investment, enquire about a ScanPlan Plus repair and maintenance contract today!

Superior Driveline Repair Cover, **

ScanPlan Plus maintenance & driveline repair contracts keep your Scania going further, plus some!
