

J4R JAW CRUSHER

The J4R recirculating jaw crusher combines the productivity of the J4 with the versatility of a full screening and recirculating system, suited particularly to construction and demolition recycling, asphalt recycling, and aggregates.

FEATURES

- ✓ Large 1060mm (42") x 700mm (28') Jaw opening to accommodate large feed sizes.
- ✓ 1200mm (48") wide main conveyor belt with Toughflex® belt
- ✓ High TPH due to jaw chamber design and enhanced material flow
- ✓ Deeper jaw chamber with proven performance in hard rock applications
- ✓ Wide main and side conveyor for enhanced material flow and handling.
- ✓ Electric option
- ✓ 365SiteConnex Telematics enabled

J4R TECHNICAL DATA

The large 1060mm (42") x 700mm (28") jaw chamber accommodates large feed sizes, contributing to higher production in material processing. The material path can be enhanced with an optional double deck 1064mm x 2215mm (41.9" x 7' 3") double deck grizzly prescreen under the hopper that, along with the variable speed pan feeder, allows for better sizing of material with a variety of mesh options.

McCloskey engineers have designed the J4R to meet the evolving requirements of today's projects and operations with its 12" DSE Control Panel for high operational performance and reliability and 365 Site Connex telematics, where available.
