MORE UPTIME. MORE PRODUCTION. LESS CAPITAL OUTLAY.

Give your Tigercat a second life with a factory standard mid-life rebuild - designed to maximise performance without the cost of replacement.

A Tigercat mid-life rebuild reduces downtime and boosts productivity, extending the life of your machine while avoiding the capital expense of buying new. Every rebuild is completed to exact Tigercat factory standards by our highly trained technicians, using only genuine Tigercat parts.

WHY REBUILD?

- Reduce downtime and increase production
- Rebuilt to exact factory standards
- Performed by highly trained Tigercat technicians
- Genuine Tigercat parts - no compromise
- Extend the life of your Tigercat without the price tag of a new machine

Talk to our team today about a Tigercat mid-life rebuild

Donaldson 4WD and Japanese Truck filter kits

Quality, reliable filtration is an essential component of maintaining sophisticated, modern diesel engines.

Over the past decade, numerous emissions standards and engineering achievements have come together to create advanced, clean and flexible engines. These diesel engines operate under high pressure and require an increasingly higher degree of filtration.

Whereas most 4WD filter brands have been developed by automotive filter specialists, Donaldson is an industry leader in heavy-duty filtration for off-road diesel engines.

With Donaldson's range of Heavy Duty 4WD Filter Kits, your engine will operate with better protection between filter replacements and save you on costly downtime and repairs.

KITS FROM \$47.⁸³

Available for range of different makes and models including:
Ford, Holden, Isuzu, Mazda, Mitsubishi, Nissan, Toyota, Volkswagen

Problem:

Rising floodwater + Power outage =

Solution:

Isuzu GS020-PTY
